1 Introduction

This document is a project plan for developing a Django Web Application that allows Cypher Path users to enter a URL for online Virtual Machines and select which Virtual Machines will be downloaded onto Cypher Path's servers. The purpose of the project plan is to provide a roadmap for Cypher Path and the software development team of the development process and help keep track of the progress.

Subsequent sections of this project plan will cover the scope of the project, the software engineering approach that will be used for the project and an estimate for how long the project will take broken by task in the form of a Gantt Chart.
